

IN-HOUSE TRAINING · COURSE CONTENT

WEBDEV for WINDEV developers

WEBDEV Training · 3 days (21 h)

Prerequisites (Who is this training course intended for?)

Target audience: developers who master WINDEV and wish to build their skills in WEBDEV (accelerated equivalent of WEBDEV Fundamentals 1+2 in 3 days).

Prerequisite: be an experienced WINDEV user or have attended the WINDEV Fundamentals 2 training course.

This is the accelerated 3-day equivalent of the "WEBDEV Fundamentals 1+2" training course, intended for developers who master WINDEV.

The WEBDEV "Advanced" training courses are ideal complements to this training course.

Take advantage of exceptional pricing offers by attending the WEBDEV "WINDEV developer course - 5 days" training. After attending this training course, you will master the basics for developing Internet and Extranet sites and applications that manage data and processes.

3 days (21 h)

Price
Flat rate for 1 to 8 developers on-site and 1 to 6 remote.

Training Provider Registration Number (NDA)
91340055934

Last updated
September 2026

Detailed Program

The following is the suggested content of this training session:
(This content can be fully customized)

The instructor uses the course materials, which are tailored to the training objectives (the materials are provided at the beginning of the course). This course support material is divided into subjects.

All of these methods and exercises will help you put into practice what you have learned, when you return to your company.

Each subject is based on 3 axes:

Axis 1

The trainer gives a theoretical presentation of the topic, followed by any questions and answers.

Axis 2

Practical application exercise (individual work) to be completed within a set time limit. The trainer remains available to help and provide additional explanations.

Axis 3

Correction of the exercise, with all necessary explanations and any questions and answers. The trainer makes sure that each trainee has fully understood the exercise before continuing.

WEBDEV for WINDEV developers

3 days (21 hours)

OBJECTIVES

- Create a dynamic site (topics 1, 2)
- Build "mobile-friendly" sites (topic 2)

- Web server architecture
- Hosting providers
- Deployment via physical media
- http deployment
- Cloud deployment
- Administering the site on the server

Teaching, technical and supervisory resources

In-person in-house training

Each participant is equipped with:

- printed course materials
- a notebook
- a pen

The instructor leading the training is an experienced PCSoft employee.

In-house Online Training

During the training, you will be in constant contact with the trainer via the GoTo Meeting (©) software, which allows you to share your screen and the trainer's screen. You will connect to the workstations using RustDesk (©); the trainer will provide you with the login information on the first day of the training.

You can also interact with the other participants to foster a friendly atmosphere during the training and promote productive technical discussions.

The course materials (PDF format) are sent to you with the joining instructions before the training begins.
