

IN-HOUSE TRAINING · COURSE CONTENT

WINDEV MOBILE

WINDEV Mobile Training · 3 days (21 h)

You will learn how to configure the environment to access the device, cross-platform development, interacting with different databases and synchronizing them, push notifications, sliding windows, handling GPS, taking photos, creating and consuming Webservices, integrating the map control, creating apps with a modern look, deploying your applications, etc.

Prerequisites (Who is this training course intended for?)

Target audience: developers who want to create Android and iOS applications with WINDEV Mobile.

Prerequisite: have already developed applications with WINDEV or have previously attended the WINDEV Fundamentals Level 1 training course.

Practical information

Format
In-house

PCSoft Level
Level 2

Duration
3 days (21 h)

Price
Flat rate for 1 to 8 developers on-site and 1 to 6 remote.

Training Provider Registration Number (NDA)
91340055934

Last updated
September 2026

Detailed Program

The following is the suggested content of this training session:
(This content can be fully customized)

The instructor uses the course materials, which are tailored to the training objectives (the materials are provided at the beginning of the course). This course support material is divided into subjects.

All of these methods and exercises will help you put into practice what you have learned, when you return to your company.

Each subject is based on 3 axes:

Axis 1

The trainer gives a theoretical presentation of the topic, followed by any questions and answers.

Axis 2

Practical application exercise (individual work) to be completed within a set time limit. The trainer remains available to help and provide additional explanations.

Axis 3

Correction of the exercise, with all necessary explanations and any questions and answers. The trainer makes sure that each trainee has fully understood the exercise before continuing.

WINDEV MOBILE

3 days (21 hours)

OBJECTIVES

- Configure the environment to access the device (topic 1)
- Create end-user interfaces with a modern look (topic 3)
- Interact and work with local and remote HFSQL databases. (topic 2)
- Interact and work with a remote database via access to Third-party databases (topic 2)
- Synchronize local and remote databases (replication) (topic 2)
- Use the map control. (topic 3)
- Send Push notifications (topic 3)
- Changing content by swiping (topic 3)
- Multi-platform management (project configurations, layouts) (topic 3)
- Create and consume a Webservice. (topic 2)
- Use QR Codes. (topic 3)
- Scan bar codes (topic 3)
- Deploy your applications. (topic 4)

CONTENT

Topic 1. Overview of WINDEV Mobile — 2 h

- Android hardware and environment
- Android versions and compatibility
- iOS hardware and environment
- iOS development licenses
- Summary of mobile issues

Topic 2. The database — 4 h

- Using a Local HFSQL database
- Using an HFSQL C/S database
- Using a remote MySQL database
- Synchronizing a local database with a remote database (replication)
- Using any database via Webservice
- Using any database via the Third-party database access server

Topic 3. The WINDEV MOBILE application — 14 h

- New UI & UX (round buttons, animations, infinite looper controls, infinite tables, ...)
- The Action Bar / Nav Bar control
- Push notifications
- The Map control

- GPS functions
- Sliding windows
- Changing content by swiping
- Swipe management
- The looper control
- The table control
- Internal windows
- Taking photos
- Drawing in the application (signature)
- Multi-platform management (project configurations, layouts)
- Pull-to-refresh management
- Parallax and floating buttons
- The Multiline zone control
- Bar code and QR Code management
- Print management
- Bottom sliding windows (bottom sheets)

Topic 4. Installation

1h

- Deployment via USB
- Google Play deployment
- AppStore deployment
- Private Store deployment

Teaching, technical and supervisory resources

In-person in-house training

Each participant is equipped with:

- printed course materials
- a notebook
- a pen

The instructor leading the training is an experienced PCSoft employee.

In-house Online Training

During the training, you will be in constant contact with the trainer via the GoTo Meeting (©) software, which allows you to share your screen and the trainer's screen. You will connect to the workstations using RustDesk (©); the trainer will provide you with the login information on the first day of the training.

You can also interact with the other participants to foster a friendly atmosphere during the training and promote productive technical discussions.

The course materials (PDF format) are sent to you with the joining instructions before the training begins.

Arrangements

Price	Flat rate for 1 to 8 developers on-site and 1 to 6 remote. Ask us for a free quote.
Financing	skills development plan, OPCO, direct funding.
Agreement	A detailed training agreement is available upon request.
General conditions	PCSoft's general terms and conditions and specific training terms and conditions apply. General Terms and Conditions Special Terms and Conditions of Service
Rules and Regulations	Please review the rules and regulations for trainees at the PCSoft training center. Rules and Regulations Procedure for the Prevention and Handling of Violence, Harassment, and Discrimination

Methods for monitoring the execution of the training session

At the end of the training course, participants' mastery of the skills is assessed through a multiple-choice test. Non-certification, non-degree program—certificate of completion.

Prices and VAT

It all depends on where you live:

- Mainland France: The training is subject to French VAT (20% as of 01/01/2014).
- Overseas Departments (DOM): The VAT rate (known as "octroi de mer") varies by DOM (Martinique, Guadeloupe, and Réunion: 8.5%; French Guiana: VAT-exempt).
- COM and POM: excluding tax.
- EEC: Invoicing excluding tax (provide the European VAT number).
- Other countries (outside the EEC): excluding tax.

Accessibility

PCSoft is particularly committed to including people with disabilities in its training programs.
